TRANCO GLOBAL SMASHES 2018 REVENUE PREDICTIONS

Local International Freight Forwarder Realizes 500% Increase in Gross Revenue

Chattanooga, Tennessee - Tennessee-based TRANCO Global today reported aggregate year-end revenue of \$10 million for 2018. This is a nearly 500% increase over the company's 2017 gross revenue of \$1.7 million.

"We owe our success to our logistics Coordinators," said Abe Church, Vice President of Operations for TRANCO Global. "We've grown exponentially over the year with our Chattanooga headquarters and Atlanta office handling more than 5,500 individual shipments. We can't wait to continue to deliver measurable successes for our growing customer base in 2019."

TRANCO Global's strategy of rapid, sustainable growth of both employees and customers continued to prove successful throughout 2018 with many months' revenue numbers nearly reaching 2017's gross revenue itself.

"2018 provided us the opportunity to triple our workforce," said Church. "We especially ramped up our air freight operations with the opening of our Atlanta office in the second quarter of 2018. With the increase in employees and services, we also more than tripled our customer base to 500 organizations last year."

TRANCO Global is a technology-based transportation and logistics company founded in 2016. Through the TRANCO Global Network (TGN), the company provides a full menu of international and domestic freight forwarding services, including ocean and air freight, truckload, less-than-truckload, customs clearance, warehousing, and distribution.
